

Marked-up copy of the claims as amended:

IN THE CLAIMS:

Please amend the claims as follows:

12 (Amended) An organic electroluminescence display device comprising:

a resin substrate; and

an insulating film comprising a nitride [on] in contact with the resin substrate.

15 (Amended) An organic electroluminescence display device comprising:

a resin substrate; and

an underlying insulating film formed [on] in contact with the resin substrate,

wherein the underlying insulating film comprises a first insulating film comprising a nitride and a second insulating film comprising silicon oxide.

24(Amended) An organic electroluminescence display device comprising:

a resin substrate;

an insulating film comprising a nitride [on] in contact with the resin substrate; and

a channel region of a thin film transistor, wherein the channel region comprises amorphous silicon and is formed over the insulating film.

29 (Amended) The organic electroluminescence display device according to claim 27 wherein said first insulating film comprises a material selected from the group consisting of silicon nitride and silicon oxy-nitride.

30 (Amended) An organic electroluminescence display device comprising:

- a resin substrate;
- an insulating film comprising a nitride [on] in contact with the resin substrate; and
- a channel region of a thin film transistor, wherein the channel region comprises crystalline silicon and is formed over the insulating film.

35 (Amended) The organic electroluminescence display device according to claim 33 wherein said first insulating film comprises a material selected from the group consisting of silicon nitride and silicon oxy-nitride.

36 (Twice Amended). An organic electroluminescence display device comprising:

- a resin substrate; and
- an insulating film comprising an oxy-nitride [on] in contact with the resin substrate.
